SKILLS

- **PROGRAMMING LANGUAGES**

HTML, CSS, JavaScript, PHP, Python

- **FRAMEWORKS**

jQuery, Bootstrap

- **Database**

MySQL

CERTIFICATIONS

2021: TOEIC 765 issued by IIG

INTERESTS

- Web Development: always try to learn new technology when I'm free
- Hi-Tech news in general: New smartphone, CPU, GPU coming out? I want to know all about it.
- Languages: I love languages like Japanese, Chinese. I may seriously learn them someday.

OBJECTIVE

I'm Nguyen Duc Anh Duy, a self-taught web developer, I've been interested in IT especially Web Development for a long time despite my major. I consider myself a humble but also ambitious person. Furthermore, I'm capable of working in a team or on my own. I am curious and am constantly learning to be the better version of myself.

PROJECTS

- **Biometric Attendance System**

 -

- Team size: 2
- Project Description: A full-stack web app that keeps track of user attendance withfingerprint or RFID card.
- Responsibilities: Design the software side of the project, web interface, multi user role based login system, basic administrator functions like adding,editing and deleting users. It also includes an real-time chat application inwhich we can search for user name or see their online status.
- Used: HTML/CSS, JavaScript, PHP, MySQL, Bootstrap 5, jQuery.
- Accomplishments: Learned how to use frameworks, how web hosting works, how hardware and server communicate, improved teamwork and communication skills.

- **Flappy Bird Clone**

 -

- Project Description: Creating a Flappy Bird clone using Python, trying to mimic as close aspossible to the original version.
- Features: changing background, different bird colors as player loses,random pipe's height, display highest score, falling animation and alsosound effects.
- Accomplishments: Leaned new programming language, how game animation works.

EDUCATION

- **HCMC University of Technology and Education**

Major: Computer Engineering   2017 - Present
